A cluster of structural and regulatory genes for light-induced carotemogenesis in Myzococcus xanthus.";

Bur. J. Blochem. 233:238-248(1995).
-!- FUNCTION: This enzyme converts phytoene into zeta-carotene via intermediary of phytofluene by the symmetrical introduction of double bonds at the C-11 and C-11' positions of phytoene.
-!- COFACTOR: FAD (Probable).
-!- COFACTOR: FAD (Probable).
-!- COFACTOR: FAD (Probable).
-!- SIMILARITY: Belongs to the phytoene dehydrogenase family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Bacteria; Proteobacteria; Deltaproteobacteria; Myxococcales;

I. FUNCTION: This enzyme converts phytoene into zeta-carotene via the intermediary of phytofluene by the symmetrical introduction of two double bonds at the C-11 and C-11' positions of phytoene.
I. COPACTOR: PAD (Probable).
I. PATHWAY: Carotenoid and chlorophyll biosynthesis.
I. SIMILARITY: Belongs to the phytoene dehydrogenase family.

"Conserved enzymes mediate the early reactions of carotenoid

"Conserved enzymes mediate the early reactions of carotenoid

biosynthesis in nonphotosynthetic and photosynthetic prokaryotes.";

Proc. Natl. Acad. Sci. U.S.A. 8:9975-9979(1990)

-!- FUNCTION: This enzyme converts phytoene into lycopene via the
intermediaries of phytofluene, zetta-carotene and neurosporene by
the introduction of four double bonds.
-!- COPACTOR: FAD (Probable).
-!- FATHMAY: Carotenoid biosynthesis.
-!- PATHMAY: Carotenoid biosynthesis.

Ruiz Hidalgo M.J.;
Submitted (MAR-1994) to the EMBL/GenBank/DDBJ databases.
-!- FUNCTION: This enayme converts phytoene into zeta-carotene via tintermediary of phytofluene by the symmetrical introduction of intermediary  Parotenoid biosynthesis.
-!- SAMILARITY: Belongs to the phytoene dehydrogenase family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Bukaryota; Pungi; Zygomycota; Zygomycetes; Mucorales; Mucoraceae;

-!- FUNCTION: This enzyme converts phytoene into zeta-carotene via the intermediary of phytofluene by the symmetrical introduction of two double bonds at the C-11 and C-11' positions of phytoene.

Bacteriol. 177:6575-6584(1995).

-!- FUNCTION: This enzyme converts phytoene into lycopene via the intermediaries of phytofilene, zeta-carotene and neurosporene by the introduction of four double bonds (By similarity).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Carotenoid biosynthesis; Oxidoreductase; FAD; Flavoprotein; NAD

Mactivation and analysis of cryptic crt genes for carotenoid biosynthesis from Streptomyces griseus.";

Mol. Gen. Genet. 252:658-666(1996).

-!- FUNCTION: This enzyme converts phytocene into zeta-carotene via tintermediary of phytofluene by the symmetrical introduction of double bonds at the C-11 and C-11' positions of phytoene.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            -!- SIMILARITY: Belongs to the phytoene dehydrogenase family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Bacteria; Actinobacteria; Actinobacteridae; Actinomycetales;

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               409
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        469
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               471
A; Title: Transcriptional activation of flanking sequences by Th1000 insertion. A; Reference number: $52583; MUID:95107237; PMID:7808390
A; Recession: $52586
A; Accession: $52586
A; Status: preliminary; nucleic acid sequence not shown; translation not shown A; Residues: preliminary; nucleic acid sequence not shown; translation not shown A; Residues: 1-492 < LIN>
A; Residues: 1-492 < LIN>
A; Ross-references: RMB:M90698; NID:g148393; PIDN:AAA21263.1; PID:g148397
A; Note: the nucleotide sequence was submitted to the EMBL Data Library, April C; Superfamily: phytoene dehydrogenase
C; Keywords: oxidoreductase
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              YFNQBKWRLAFCFQSKYLGMSPWECPALFTMLPYLEHEYGIYHVKGGLWRIAAAMAQVIA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              62 AIBELFTLAGKQIKOYVELLPVAPFYRLCWESGKVFNYDNDQAQLEAQIQQFNPRDVEGY

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                              US-09-941-947A-22

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Sequence 16,
